## Technical Skills

### Strong:

JavaScript(ES5/ES6), jQuery, HTML5, CSS3, OOP, React.js, Redux, JSON, AJAX, Axios, APIs, Sass, Materialize

### Experienced:

MySQL, PHP, Ubuntu, XAMPP, AWS EC2, Regex, Canvas, WordPress, Node.js, Apache2, Flexbox, Bootstrap, Arduino

### Tools:

Github, Git Bash, AWS, Chrome Dev Tools, Meistertask, Trello, VS Code, Agile Method, Figma, DB Designer, Postman, Slack

## Education

### University of California, Irvine

*B.A. in Business Economics*  
*Minor in Accounting*

### LearningFuze, Irvine

*Accelerated Web Development Program*

- Over 70 hours of coding per week
- Students are immersed in a full stack to learn the fundamentals of web and software development with over 800 hours of work

## Additional Information

**Hobbies:** I love going hiking not only for the view, but the cutest dogs I get to pet during the hike.

**Fun Fact:** I speak conversational Vietnamese and can catch food with my mouth from far distances. I am currently on a mission to find the best salt & vinegar potato chip.

## Projects

### Succulents and Cacti Store - [Live](#) | [Github](#)

- Glued together **Redux** with **React.js** to communicate with components through a common store and props
- Incorporated **Materializes'** grid system to focus on enhancing the customer's **UI** and **UX**
- Used PHP backend to allow **CRUD** operations within MySQL for a user's shopping cart

### Job Tracker - [Live](#) | [Github](#)

- Implemented a mobile responsive full stack project using **PHP** to interact with the server side, and **React.js** styled with **Materialize** to manipulate the client-side
- Used **Redux** to achieve a functional sign in, sign up, and sign out system for users and guests
- Utilized **Meistertask** to coordinate sprints, swim lanes, and scrums by following **the Agile Methodology**
- Applied **React-Router** to make a **Single Page Application** and to pass information from page to page

### Agile Process Spitballer - [Live](#) | [Github](#)

- Utilized 4 different **API's** to make **AJAX** calls to cohesively put together an application that assists in ideation creation in the **agile** method
- Developed application with **OOP** format in 48 hours and worked in teams to better communicate and understand the importance of **Github** and merging
- Applied **HTML5**, **CSS3**, **Flexbox**, and **media queries** to achieve a responsive layout for the board

## Professional Experience

### STEM Instructor | Brainstorm 2018-2019

- Instructed and educated students in science, technology, engineering, and math related curriculum
- Used different technology software instruments such as Arduino Esplora, Scratch, NXTs, EV3, and Bloxels to help students explore simple programming and encourage them to think in a programmatic manner
- Enforced classroom management to foster a creative and productive learning environment

### Tax/Audit Intern | Novogradac & Company LLP 2017

- Worked for 60+ hours per week in teams to prepare yearly audits and taxes for clients
- Prepared and reviewed detailed financial statements
- Coordinated with clients by meeting to fulfill and understand the client's exact needs and concerns
